

Paramode produces a wide range of stop collars from 2 3/8" to 20" with squared shoulder / single bevel / double bevel / heavy duty or specials in mild or stainless steel. All collars are also available in a variety of colours.

If you require a different variation of stop collar, our engineers will develop and manufacture them to your exacting specifications.

Markings

- Sizes clearly marked on each collar

Availability

- Paramode has designed and built centralisers, stop collars and downhole accessory products for many years.
- Comprehensive register of designs available covering most sizes of tubing, casing and riser.
- Our considerable experience in this field allows us to react quickly to technical queries and provide recommendations without delay.
